This is in response to Paper filed on 02 June 2006.

I. The following is an examiner's statement of reasons for allowance:

(i) There are on the record that: (1) Aylward et al disclose, teach and suggest a blue sensitive silver halide grains having 0.6 microns. Applicant states in the response filed on 02 November 2005 that the Aylward et al grains have 0.75 microns in a sphere-corresponding diameter. (2) The Office action mailed on 02 December 2005 is on the use of Alyward et al grains being obviously close to that of 0.7 microns in a sphere-corresponding diameter as claimed. The showings are much narrower than those in the instant claims (3) In response filed on 02 June 2006, applicant insists that the showings and the combined embodiments in the broad claims are all better than those in the applied Alyward et al and Yamashita et al for patentability of the instant claims.

(ii) In the absence of an evidence to support, the rejection on the record is withdrawn until someone could be able to show that (*) Aylward et al grains have about 0.7 microns in a sphere-corresponding diameter or (**) there is no or obviously about the same result as those in the applied Alyward et al and

Yamashita et al with any combination of the embodiments as broadly claimed and urged.

(iii) Method claims 14-16 being depended on independent claim 1 are permitted to be rejoined with independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.
